

# Crawl Space Clean Out & Vapor Barrier Installation

Often times homeowners are unaware that their crawl space areas, are the root of many problems. On many occasions we will find rotting wood, excess moisture, standing water, animal infestation and contamination, and mold. These problems can lead to extreme damage to your home and health if untreated. With our expertise and trained crew we are able to turn a hazard crawl space into one that a homeowner can feel safe and assured about.

## Procedures

- Clean-up Debris
- Repair or replace HVAC ducting
- Remove & install Vapor Barrier
  - Replace Insulation
- Replace or repair floor boards
  - Repair water damage

## Why Clean Your Crawl Space?

- Wet or Molding installation
- Rotting Wood
- Rodent Infestation/contamination
- Allergies to old material
- Upgrade to new and improved materials
- Rotting debris left under vapor barrier
- Improper installation of vapor barrier

Let us help create a safe and healthy crawl space area!

# Drainage Design & Installation

## Retaining Wall Drainage

Retaining wall drainage helps prevent your wall from eroding. With our expertise we fill the back of your wall with river rock and pipe to collect the water to drain away from the wall. If this process is not completed you will end up with a wall that will collapse.

## Foundation Drainage

The importance of foundation drainage prevents standing water under your home which can lead to molding and water damage to your crawl space.

## French Drainage

If your lawn or flower beds seem to fill with water this technique draws water away. During this process we run lines of pipe and gravel to force water to correct drainage areas.

## Erosion Control Drainage

This process will help prevent damage to eroding hillsides. With our expertise we would evaluate your conditions and make a decision which method would help. Prevention methods: retaining walls, hydroseeding, planting, etc.

## Why Install Drainage Solutions?

- Prevent erosion damage
- Eliminate standing water
- Prevent foundation flooding
- Prevents Mold
