

# Quality Irrigation

Going Green. One Tree At A Time.

253-841-3367

1-877-808-1JAC (522)

Our standard irrigation system is no standard in the industry. The products we install are from one of the best manufactures in the irrigation industry.

Much consideration goes into the design of your irrigation system. We carefully design the placement and selection of each irrigation

**We offer full service irrigation maintenance.**

head to ensure that water coverage is where it needs to be to minimize water consumption. In addition, we design our systems considering water volume and pressure to prevent proper use without damage.

J.A.C. Landscaping design and installation professionals will create a system that lasts indefinitely with minimal maintenance, will reduce your personal watering care, add to the investment of your property value, and will insure proper growth of your yard.

Our team that will save you money and improve the quality of your yard.

## Water Efficient Irrigation System

If you are looking to upgrade from our standard system the MP Rotor and the MRR40 partnership will provide you with a more water efficient system. After in-depth research from Hunter Industries they have chosen this dual system to be an outstanding choice for any residential or commercial project. We have taken a stand in educating and providing our company with the ability to offer this option to our customers. We are proud to stand out from the rest of our competitors and offer this more efficient system.

# Your Watering Needs

## Our Reliable Installed Products

PGP Rotor

This device has promised a quality and unbelievable even water distribution throughout your lawn for more than 25 years. With its new technology it will surely provide outstanding results.
